SCENARIO OUTPUT

Scenario	Revenue Growth	EBIT Margin	WACC	Fair Value	Upside / Downside
--- ---	--- ---	--- ---	--- ---		
Bear	3.00%	18.00%	11.00%	84.74	-60.26%
Base	7.00%	25.00%	9.00%	210.34	-1.37%
Bull	11.00%	30.00%	8.00%	374.12	75.44%

ANALYST INTERPRETATION

- Compare the base-case fair value to the current market price.
- Use the bear case to understand downside risk.
- Use the bull case to understand upside optionality.
- Validate revenue growth, margins and WACC using company filings and market data.

IMPORTANT NOTE

This is a simplified DCF model for research workflow purposes. It should be reviewed and validated before investment use.

ANALYST FINAL CHECKLIST

- Confirm the investment thesis is clearly stated.
- Confirm red flags and downside risks are documented.
- Confirm valuation assumptions are reasonable.
- Confirm position size is aligned with conviction and risk.
- Confirm the report is ready for management or investment committee review.
